

CONSOLIDATED TERMINALS & LOGISTICS CO.

Consolidated Terminals & Logistics Co. (CTLC) is a freestanding logistics and transportation company that services a wide range of global customers far beyond the agricultural industry. CTLC provides safe and cost-effective handling, storage, throughput and transportation solutions using truck, rail, barge, and vessel alternatives.

CTLC has a port located at 2801 Bluff Road, Mt. Vernon, IN (Port of Indiana, Mt. Vernon on Ohio River - Mile 828). Railroad access is served by Evansville Western short line railroad with interchanges to 5, Class 1, railroads and has a 200 car rail storage capacity. Multiple trucking companies with highway connections to I-64 and the future I-69 also serve this port.

By using an established network of handling assets and business partners, CTLC offers its customers entrepreneurial approaches to controlling shrinkage risk and solving individual needs. Regardless of whether clients need one truckload moved or the entire cargo of an oceangoing vessel, CTLC helps customers worldwide find the best options available to get their products and commodities from origin to destination in the most economic, timely, and safest route.
